PROFESSIONAL SUMMARY

Technology professional and entrepreneur with experience in web application development, API integration, process automation, and digital project leadership. I combine software development expertise with experience in planning, team coordination, and product management. I have contributed to digital platforms, artificial intelligence service integrations, and the design of automation workflows. I am currently pursuing a degree in Software Engineering at Instituto Tecnológico de Sonora.

PROFESSIONAL EXPERIENCE

642 Studio — Chief Executive and Creative Director | Technology Project Management

2022–Present · Navojoa, Sonora

- Lead software and digital production projects, defining requirements, priorities, deliverables, and team coordination.
- Contribute to the development and deployment of web applications using Next.js and React, with Supabase/PostgreSQL and Vercel.
- Drive API integrations, automation, and AI model-based solutions for digital products and operational processes.
- Coordinate initiatives combining digital platforms, media, and audiovisual production, including live streaming.

Yegaz Espacio Informativo — General Manager

August 2017–March 2020 · Navojoa, Sonora

- Managed a five-person team and coordinated hiring, training, and operational processes.
- Developed service proposals and commercial approaches aligned with client needs.

Agencia Publicitaria Muster — Marketing Director

January 2019–August 2019 · Hermosillo, Sonora

- Oversaw marketing content and materials, monitored campaign results, and coordinated activities with vendors and media outlets.

Ciber en un Click — Customer Service

November 2018–July 2019 · Navojoa, Sonora

- Provided customer service and guidance on technology services and supported daily operations.

SELECTED PROJECTS

642 Core — Defined management modules, integrations, data structures, and internal process automation.

CIBAPAC 2026 Digital Platform — Tools for accessing sports information, statistics, and broadcasts; integration of CibaBot, an AI-powered assistant.

Paskolas Navojoa — Coordinated website development, commercial workflows, and integrations for the 2026 season.

TECHNICAL SKILLS

Web development: JavaScript, TypeScript, React, Next.js, Node.js, Tailwind CSS

Backend and integration: REST APIs, PostgreSQL, Supabase, Prisma

AI and automation: Large language model (LLM) integration, AI APIs, n8n, Make

Deployment and development: Vercel, Git, GitHub

Technology management: Requirements analysis, planning, documentation, team coordination, and deployments

ACADEMIC AND CONFERENCE PARTICIPATION

Speaker and Workshop Facilitator — Tecnológico de Antioquia · Medellín, Colombia · October 2026

Presentation on intelligent automation, APIs, and artificial intelligence; workshop on geospatial application development during an ITSON academic visit.

Academic Delegate — XII SEIIIS 2026

Participated in ITSON’s 12th International Seminar on Research and Innovation in Software Engineering.

National Youth Forum “Voices of the Future” — Chamber of Deputies · Mexico · August 2026

Participated in a panel on artificial intelligence, innovation, and the future of employment; presented a proposal for an AI assistant for academic progress monitoring.
